

Artificial Smoke in Hot Fire Training – A Comparison...

Fireplace with conventional water-based fog system
(yes, it was on full output!)

Flashover with Phantom oil-based Smoke System

Photos from site visit 4th August 2009, Stevenage (Herts) Longfield Site

Nothing beats the Phantom!

- Extremely dense, high volume, persistent smoke output
- High temperature resistance of smoke (up to 200°C)
- Very efficient fluid consumption
- Ideal for ducting
- The safest smoke system currently available
- Huge reduction in volume of smoke fluid used compared to water based systems
- 10 year guarantee, lifetime warranty on heater block
