

PS19 Mini Rocket Battery Pack – Safety Recall

Identification of Affected Batteries

This document has been produced to help you identify whether your battery is impacted by the recall.

At a glance: your battery is affected if the code in Position A or Position B falls within the affected range shown on page 2. If your label cannot be read, or you are unsure, please contact Pea Soup with photographs info@smokemachines.net

Step 1 - Find the identification label

Remove the smoke machine top part from the battery pack base by undoing the thumb screws at the front and lifting off.

Check the locations on the battery base, marked A, B and C below.

Positions A and B are usually white or silver stickers; Position C is printed on the battery label itself.

		<p>A. Position A - AKPT batch sticker</p> <p>Look for a white or silver sticker starting AKPT. The four digits after AKPT are week and year. Example: AKPT3920 = week 39 of 2020.</p>
		<p>B. Position B - B1 serial sticker</p> <p>Look for a white or silver sticker starting B1. Example: B12026088 = B1, year 2026, number 088.</p>
		<p>C. Position C - battery manufacturer label</p> <p>Look for the printed battery label. If it clearly says Q-Batteries 12LS-12 (F2), it is not affected.</p>

Overall battery pack - check A, B or C

If you need help, send one photo of the whole battery pack and close-up photos of any labels in positions A, B and C to info@smokemachines.net
